

## **BASEL-II DISCLOSURES** **(As on 31<sup>st</sup> March 2009)**

As per RBI guidelines, the Bank has migrated to Basel-II framework as on 31.03.2008. Under Pillar-III of the framework, Bank's "Basel-II Disclosures" as on 31.03.2009 are as under:

### **Capital Management**

Capital management is aimed at ensuring that there is sufficient capital to meet the requirement of the Bank as determined by its underlying business strategy and also that sufficient cushion is available to absorb unexpected shocks that could arise out of adverse market conditions and external factors.

The Bank aims to maintain Capital Adequacy Ratio (CAR) at 12% against the regulatory minimum level of 9% (with Tier-I capital at a minimum of 8%). Excess capital above the regulatory minimum is for supporting anticipated future business growth and to serve as a buffer for any unexpected shocks thereby ensuring that the Bank's CAR does not fall below the regulatory minimum level even in adverse conditions.

### **Risk Management**

The risk management processes and practices employed by the Bank have been developed in the wider context of the relationships between risk, capital and earnings.

The strategic objectives set by the Board determine the Bank's risk appetite, which is an important input for its capital planning and performance management. Risk appetite is the maximum risk the Bank is willing to accept in executing its business strategy while staying protected against events that may have an adverse impact on its profitability and capital base. Risks are being managed by using limits or checkpoints set across all dimensions of capital, earnings volatility and concentration risk. These limits are determined by a well-defined maximum risk appetite.

By adopting an integrated risk management approach, the Bank seeks to improve its methods for identifying and quantifying risks, to develop a more effective risk management system, to achieve a stable balance between earnings and risk, to eliminate concentrations of specific risks, to create an appropriate capital structure, to achieve optimal allocation of resources, and to sustain high asset quality. This contributes to the strengthening of the financial health of the Bank and maximizing of shareholders' value.

The Bank broadly classifies and defines risk types as under:

Credit Risk	The risk of financial loss in credit assets (including off-balance sheet instruments) caused by deterioration in the credit conditions of counterparties.
Market Risk	The risk of financial loss where the value of assets and liabilities could be adversely affected by changes in market variables such as interest rates, securities prices and foreign exchange rates.
Liquidity Risk	The risk to earnings and capital arising from a bank's potential inability to meet its liabilities when they become due without incurring unacceptable losses.
Operational Risk	The risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events.
Interest Rate Risk in Banking Book	The risk that the value of bank's financial assets may decrease and/or the value of the bank's liabilities may increase because of changes in interest rates. Interest Rate Risk arises primarily from the maturity mismatch of assets and liabilities. The overall objective is to manage current and future earnings sensitivity to interest rate risk exposure.

The Bank has the following risk management committees in place for its overall risk management: Risk Management Committee of the Board, Credit Risk Management Committee, Market Risk Management Committee and Operational Risk Management Committee. Besides these committees, the Bank's Assets-Liabilities Management Committee (ALCO) and Balance Sheet Management Group monitor the build-up of assets and liabilities across maturities for liquidity tracking and assessing rate sensitivity on an ongoing basis.

The various risk management committees discuss and dynamically manage the different types of risks both from qualitative and quantitative perspectives. The Board of Directors lays down the Bank's risk management policies for various types of risk based on the discussions held by these committees.

In terms of RBI guidelines on Basel-II framework, the Bank has adopted the Standardised Approach for Credit Risk, Standardised Duration Approach for Market Risk and Basic Indicator Approach for Operational Risk. In addition to regulatory capital requirement of computation as per Pillar-I, the Bank also assesses Liquidity Risk and Interest Rate Risk, and carries out stress tests on a regular basis to assess adequacy of the capital available as a cushion to withstand shocks from market forces and external factors.

Qualitative and quantitative disclosures in terms of RBI guidelines and our Disclosure Policy are appended in the Disclosure Tables (DT) 1 to 10.

## **DT-1: SCOPE OF APPLICATION**

Basel-II framework is applicable to the Bank at solo level. It has no subsidiary. However, investment in MGB Gramin Bank Pali (in which Bank has 35% equity stake) has been deducted from Tier-I and Tier-II capital -50% each.

(credit risk mitigation including from staff)

**DT-6: CREDIT RISK MITIGATION: DISCLOSURES FOR STANDARDISED APPROACH:****Qualitative Disclosures:****I Policies and Processes for Collateral Valuation and Management**

A Credit Risk Mitigation and Collateral Management Policy, addressing the Bank's approach towards the credit risk mitigants used for capital calculation is in place. The objective of this Policy is to enable classification and valuation of credit risk mitigants in a manner that allows regulatory capital adjustment to reflect them.

The Policy adopts the Comprehensive Approach, which allows full offset of collateral (after appropriate haircuts) against exposures, by effectively reducing the exposure amount by the value ascribed to the collateral. The following issues are addressed in the Policy:

- (i) Classification of credit risk mitigants
- (ii) Acceptable credit risk mitigants
- (iii) Documentation and legal process requirements for credit risk mitigants
- (iv) Valuation of collateral
- (v) Custody of collateral
- (vi) Insurance
- (vii) Monitoring of credit risk mitigants

**II Main types of credit risk management techniques:**

S.No.	Qualitative Disclosures	Remarks
i)	Eligible financial collaterals	(i) Cash (as well as certificates of deposit or comparable instruments, including fixed deposit receipts, issued by the lending bank) or deposit with the Bank
		(ii) Gold including both bullion and jewellery. However, the value of the collateralized jewellery is arrived at after notionally converting these to 99.99 % purity.
		(iii) Securities issued by Central and State Governments.
		(iv) Kisan Vikas Patra and National Savings Certificates for which no lock-in-period is operational and where they can be encashed within the holding period.
		(v) Life insurance policies with a declared surrender value of an insurance company which is regulated by an insurance sector regulator.
		(vi) Debt securities rated by a recognized Credit Rating Agency in respect of which the Bank is sufficiently confident about the market liquidity, where these are rated <ol style="list-style-type: none"> <li>a) at least BBB(-) when issued by public sector entities and by other entities (including banks and Primary Dealers); or</li> <li>b) at least PR3/P3/F3/A3 for short-term debt instruments.</li> </ol>
		(vii) Debt securities not rated by a recognized Credit Rating Agency where these are: <ol style="list-style-type: none"> <li>a) issued by a bank; and</li> <li>b) listed on a recognized exchange; and</li> <li>c) classified as senior debt; and</li> </ol>

		<p>d) all rated issues of the issuing bank of the same seniority are rated at least BBB(-) or PR3/ P3 / F3 / A3 by a chosen Credit Rating Agency; and</p> <p>e) there is no information available that suggests that the issue justifies a rating below BBB(-) or PR3/ P3 / F3 / A3 (as applicable) and;</p> <p>f) Bank is sufficiently confident about the market liquidity of the security.</p>
		<p>(viii) Units of Mutual Funds regulated by the securities regulator in the jurisdiction of the Bank's operation, where:</p> <ul style="list-style-type: none"> <li>• a price for the units is publicly quoted daily i.e., where the daily NAV is available in public domain; and</li> <li>• the mutual fund is limited to investing in the instruments listed in this paragraph, para II (i).</li> </ul>
ii)	On-balance sheet netting	<p>where the Bank</p> <p>a) has a well-founded legal basis for concluding that the netting or offsetting agreement is enforceable in each relevant jurisdiction regardless of whether the counter-party is insolvent or bankrupt;</p> <p>b) is able at any time to determine the loans/advances and deposits with the same counter-party that are subject to the netting agreement; and</p> <p>c) monitors and controls the relevant exposures on a net basis,</p>
iii)	Guarantees	Where guarantees are direct, explicit, irrevocable and unconditional and satisfy the operational requirements detailed in the RBI guidelines

### III Main types of guarantor counter-party and their creditworthiness:

Range of eligible guarantors (counter-guarantors):

i) Sovereigns, sovereign entities (including BIS, IMF, European Central Bank and European Community as well as MDBs referred to in RBI guidelines, ECGC and CGTSI), banks and primary dealers with a lower risk weight than the counter-party;

(ii) Other entities rated AA(-) or better. These include guarantee cover provided by parent, subsidiary and affiliate companies that have a lower risk weight than the obligor. The rating of the guarantor should be an entity rating which has factored in all the liabilities and commitments (including guarantees) of the entities.

### IV Information about (credit or market) risk concentration within the mitigation taken: As per Appendix V

#### **Quantitative Disclosures:**

For the disclosed Credit Risk portfolio under the standardized approach, the total exposure that is covered by:

<b>TOTAL :</b>	<b>62.91</b>

## **DT-9: OPERATIONAL RISK**

### **Qualitative Disclosures:**

- Operational Risk Management Policy of the Bank is in place, which establishes a consistent framework for systematic and proactive identification, assessment, measurement, monitoring and mitigation of operational risk. The policy applies to all business and functional areas within the Bank. The Operational Risk Management Policy is supplemented by operational systems, procedures and guidelines which are periodically updated. Operational Risk Management Committee has been constituted.
- Bank has put in place the following measures to control and mitigate operational risks:
  - Book of instructions, circulars, job cards, training programmes etc.
  - Delegation of financial powers at various levels of officers for different type of financial transactions
  - Inputs on operational risk are included in the relevant training programmes
  - Bank obtains insurance cover for potential operational risks
  - A system of prompt submission of reports on frauds is in place
- Risk Control and Self Assessment (RCSA) exercise for identifying and mitigating operational risks has been initiated at the Bank's branches and Zonal Offices.
- A web-based application has been developed and rolled out for automatic collation of responses in different RCSA workshops to facilitate generation of Zone-wise, Business Segment-wise and Whole-Bank-level heat-maps.
- Disaster Recovery Policy and Business Continuity Planning Policy have been put into place

### **Quantitative Disclosures:**

Capital Charge on Operational Risk : Rs. 201.95 crores  
(As per regulatory capital requirement)

## **DT-10: INTEREST RATE RISK IN BANKING BOOK (IRRBB)**

### **Qualitative Disclosures:**

- Earning at Risk (EaR) is measured as per ALM guidelines of RBI using Traditional Gap Analysis method.
- Impact of change in Interest Rates on Market Value of Equity (MVE) is measured using Duration Gap Analysis method, taking whole Balance Sheet, as per RBI guidelines.
- MVE is also measured using Duration Gap Analysis method, taking only Banking Book exposures into account as per RBI guidelines on Supervisory Review Process (Pillar-II of Basel-II framework).
- Key Assumptions used based on behavioral studies:
  - a) Saving Bank deposits: 25% of such deposits treated as non-interest bearing
  - b) Term deposits: 4% of such deposits prepaid due to embedded option
  - c) Current deposits: taken as rate sensitive for IRR purpose as per RBI guidelines
  - d) Term Loans: prepayment @ 0.08% of total term loans

### **Quantitative Disclosures:**

#### (i) Change in NII:

At the present level of our assets / liabilities, NII is likely to increase / decrease by Rs. 103.11 cr., if there is an upward / downward movement in interest rate by 1% (assuming parallel interest rate change on both assets and liabilities except Savings Bank rate that will remain constant at 3.5%).

#### (ii) Change in MVE:

- e) Taking the whole Balance Sheet into account, Market Value of Equity (MVE) will increase / decrease by Rs. 143.11 cr. if there is an upward / downward movement in interest rate by 1%.
  - f) Taking only Banking Book exposures into account, Market Value of Equity (MVE) will increase / decrease by Rs. 173.89 cr. if there is an upward / downward movement in interest rate by 1%.

Table 4(a)

**DEFINITIONS OF IMPAIRED ASSETS**

**2.1 Non-performing assets**

**2.1.1** An asset, including a leased asset, becomes non-performing when it ceases to generate income for the bank.

**2.1.2** A Non-Performing Asset (NPA) is a loan or an advance where :

- i) Interest and/or installments of principal remain overdue for a period of more than 90 days in respect of a Term Loan,
- ii) The account remains 'out of order' as indicated at paragraph 2.2 below, in respect of an Overdraft/Cash Credit (OD/CC),
- iii) The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,
- iv) The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops,
- v) The installment of principal or interest thereon remains overdue for one crop seasons for long duration crops,

**2.1.3** In case the interest charged during any quarter is not serviced **fully** within 90 days from the end of the quarter the account is classified as NPA

**2.2 'Out of Order' status**

An account is treated as '**out of order**' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power. In cases where the outstanding balance in the principal operating account is less than the drawing power, but either there are no credits continuously for 90 days in the account or the credits are not enough to cover the interest debited during the same period, these accounts are also treated as '**out of order**'.

**2.3 'Overdue'**

Any amount due to the bank under any credit facility is '**overdue**' if it is not paid on the due date fixed by the bank.
